Memorandum

To: Vice President Jim Scott
From: Lohse Beeland, chair, UF Committee on Alcohol and Other Drug Education Policy
Re: Draft of Status Report
Date: September 22, 2000

One of the charges you had given to the UF Committee on Alcohol and Other Drug Education Policy was to review the 1999 report, *UF Committee on Alcohol Use Among Our Students*, to determine the status of the recommendations made in that report. We have developed three sub committees who follow that report's headings: Education, Prevention, and Intervention; Policy and Regulation; and Programming and Social.

The sub committees were asked to review each recommendation, determine what department or group would be responsible for its implementation and contact them to determine the status of the recommendation. The discussions generated by this review led to some further conversations and topics for possible later recommendation. The attached report responds only to the recommendations made in the report and their status and does not expand on peripheral issues which may have come up in the discussions.

I have taken all of those topics and notes from the surrounding discussions and have made a list for the sub committees to review over the fall and for the full committee to consider. We'll be working through the fall, with the hope of presenting some recommendations to you by December, 2000.

I hope this report is helpful to your office.
